Hi Jennifer,

I have no problem with delaying Dyersburg's SQSH until Spring.

I'm glad to hear that you are really busy. Keep up the good work!!

James

Hi guys,

Could you help me with some information. Do you happen to know by when Dyersburg needs to submit their bug results to you guys? We were so busy with other projects this fall and then the weather wasn't the greatest, so that project got put off by my boss. It seemed to me like fewer bugs were present in the streams during the winter...even though the SOP says you can sample throughout the year, so we were really hoping to wait til spring if it wouldn't make an issue for Dyersburg. Although if it wouldn't skew their results, I could probably get this done one of these warm days if the rain will hold off.

Thank you!
-Jennifer

As far as I know it would be what we normally do, nothing extra for MS4.

Wishing everyone a great weekend!

James
